Dual Use Declaration

The Council Regulation (EC) No 428/2009 of 05 May 2009 amended by the commission delegated regulation (EU) 2018/1922 of 10 October 2018 defines “dual-use items” as items, including software and technology, which can be used for both civil and military purpose, and shall include all goods which can be used for both non-explosive uses and assisting in a way in the manufacture of nuclear weapons or other nuclear explosive devices. Declarable goods are categorized by a so called “ECCN” (Export Control Classification Number).

The International Traffic in Arms Regulation “ITAR” updated in the year 2011 regulates and controls the import and export of defence related articles and services mentioned in the The United States Munition List Annex, Section 71 a) of the Arms Export Control Act (22 U.S.C.§2797). According to Category XI-Military Electronics, under 3c) Components, Parts, Accessories, Attachment and associated equipments are exempted if they are in commercial items. Products from NTI AG are designed for commercial use.

Therefore:

NTI AG products are neither subject to the “Dual Use” regulation nor to ITAR, and as such they do not need an ECCN number.
